Safety & Risk Analysis

# Reporting PBN Incidents

## Requirement to Report

### CAR 12.57

persons who are involved in an incident must provide the Authority with the applicable details of the incident ...

#### Incident

- a defective condition or
- an unsatisfactory behaviour or
- a procedure—

which did not immediately affect the safety of an aircraft operation, but which if allowed to continue uncorrected or which, if repeated in different, but likely circumstances, would affect the safety of an aircraft operation.  
(AC12-1)

# *Advisory Circular AC12-1*

## *Facility malfunction incidents*

Total failure, significant malfunction, or out-of-tolerance operation of any aeronautical telecommunication or navigational aid facility.

## *Air traffic control services incidents*

(a) Provision of incorrect altimeter setting:

(b) Failure or inadequacy of prescribed let-down procedures:

- Reporting requirement on certificate holder
- Regardless of blame, responsibility or asset ownership
- AC12-1 is indicative, not exclusive

# *PBN Incident Risk Analysis*

By table

- Read Occurrences
- Check PBN Relevant?
- Rate PBN events by potential risk
- Present highest risk event and your reasoning
